Attachments: PFAS 21Feb2019 SA sites.xlsx

SA PFAS sites are attached. There are 6 on the "detected" tab and 2 on the "potential" tab. Is this list correct?

I'm glad you brought up Nonresponsive based on revised scope I have it on the list but with no RPM and no recent updates. I emailed Roger Reinhart this morning for an update but have not yet heard back. Is this site moving to SA?

Any thoughts on Nonresponsive based on revised scope? That is also on our list with no RPM or updates. I also asked Roger about that one.

Hi Sue,

Can you send me the list of SA sites in your inventory?

Thanks,

Yaz

Maybe, I think Water had already reported Nonresponsive based on revised scope But maybe Sue left it out since we weren't doing anything there.

I think all the SA sites are already in the inventory. Can you please check with Sue and see if she (already) has what she needs.

Thanks
Steve

Hi Steve:

Yes SAA is a Superfund Alternative Approach site.

I don't know if we've collected site assessment sites prior to this request. That said, please provide the site assessment sites (and note them as such) as I believe requests for SF involvement re: PFAS will only increase. Let me know if you have any other questions as Brigid and Linda are out today. Thanks.

Hi Linda and Brigid

Just checking. SAA is Superfund alternative approach sites, right? We have one of those in R3 and it isn't a PFAS related site.

What about Site Assessment (sites)? We have several of those with PFAS issues. I assume you are interested in those.

Thanks
Steve

Regional Superfund Division Directors

Updating the list of NPL and SAA sites where
PFAS has been detected was one of those items
that was due during the shutdown. We want to
get the update back on track, but we recognize
that there are many other pressing actions. If
at all possible, we would like to get your edits to
the list by February 28th. If you need more
time, please have your contact reach out to
Linda Gaines (gaines.linda@epa.gov). I know
some regions have been updating. The
attached list is the original I sent on

12/12/18. In addition, we will be coordinating with OEM on the removal site list they have.

Thanks in advance. Have a great weekend.

Regional Superfund Division Directors

Attached please find the current list of NPL and SAA sites that we are aware of where PFAS has been detected. I'm sure many of you are aware that regions provide information on PFAS contaminated sites to HQ through an existing HQ sharepoint site – PFAS Site Information. Periodically, HQ is asked to provide summary statistics from this data for congressional hearings, Administration talking points, press inquiries, FOIAs, etc. Providing accurate and updated information is critical. To ensure that everyone is operating under the same assumptions when the data are entered, Linda Gaines will be discussing this list at tomorrow's monthly PFAS regional coordination call and requesting regions make any necessary updates by Jan. 18, 2019. We

would appreciate your review of the results before it is submitted to HQ.

OSRTI is collaborating with FFRRO on this effort. If you have any questions, feel free to contact me, or John Burchette for federal facilities questions.

Thanks for your assistance.
